

Information Security at AcadiaSoft: ISO 27001 Certification

What is ISO 27001?

ISO 27001:2013 is the internationally recognized specification for an Information Security Management System (ISMS), and it is one of the most popular standards for information security. AcadiaSoft is adhering to the most recent version of the standard: ISO / IEC 27001:2013.

Why is ISO 27001 important?

At AcadiaSoft we take information security seriously and ISO 27001 certification ensures we do as much as possible to reduce identified risks to an acceptable level and manage them effectively.

ISO 27001 helps us reduce information security and data protection risks and comply with other regulations such as GDPR, Cyber Essentials, PCI DSS, and ISO 22301.

What are the benefits?

Minimizing risk

ISO 27001 certification ensures controls are in place to minimize the risk of an information security breach and avoid any system weaknesses being exploited.

Best practice

With ISO 27001 certification, you can be confident that AcadiaSoft has addressed all security risks relating to IT, people, physical and business continuity requirements.

Legal and regulatory compliance

Certification to ISO 27001 requires AcadiaSoft to identify and comply with applicable legislation and local regulations. This has a positive impact on risk management and corporate governance.

What does the certification involve?

AcadiaSoft's data center is ISO certified. This means we can assure our clients that we systematically examine the organization's information security risks, taking account of any threats, vulnerabilities and impacts within a standardized process. The certification requires annual audits which are reviewed and governed by independent auditors (ANAB – ANSI-ASQ National Accreditation Board) and requires adherence by the entire organization. This covers 114 security controls and clauses – all of which are audited on a 3-year cycle (with the fundamental clauses audited every year). If you would like any further information on AcadiaSoft's information security procedures or have additional questions, please contact our dedicated team at risk_assessments@acadiasoft.com
